SEXPOSER

WHO ?

Established in 2008, Portail VIH/sida du Québec (PVSQ) is a non-profit provincial community based organisation dedicated to supporting people living with HIV and disseminating information, references and education on **HIV/AIDS** and **Sexually Transmitted Infections** to all concerned individuals, notably through its website, toll free number, online chatting, workshops and conferences.

WHAT ?

We've created the first free downloadable mobile application in Quebec for the **prevention of HIV and STIs**. **Sexposer** allows users to inform themselves, assess their personal risk of exposure to HIV and STIs and find the nearest testing sites and sexual health resources. Now available in French and English, on *iOS* and *Android*, users can also send additional questions on sexual health directly by SMS confidentially. Questions in French are answered by our service **Sext'Info**, whereas those in English are sent to the Aids Community Care Montreal (ACCM) **SextEd** project.

WHY ?

Sexposer is part of a technological shift in the continued fight against HIV/AIDS and STIs in Quebec. With the resurgence of sexually transmitted infections, particularly among young people (14-25), access to reliable information can make a huge difference.
